Creamy white; beautiful; early; medium crimson tinged a darker shade; a beautiful va-

THE flowers are beautiful in form and wonderful in structure. In colors we find royal-purple and gold, all shades of blue from delicate azure to deepest velvet, cream and snowy-white, violet so dark as to be almost black, shades of fawn and brown, copper and bronze, crimson and rose, ruffled, bordered, penciled and splashed in marvelous designs, some with texture of extreme and exquisite delicacy, gleaming in the sunlight like the tracery of frost, others like heavy satin and velvet.

#### CULTURE

They will stand more neglect than any flower we know. They delight in hot sunshine and well drained soil. They should not be planted in wet places, as this will cause decay of the rhizomes. During spring and their blooming season they are very appreciative of water, but after their blooming season, during the resting period, they should have a good drying out. They may be planted in early spring, but August and September, their dormant season, is recommended as the better time.

Josephine. Very dwarf; creamy white; early20c
Kochii. Deep claret purple, early20c
Kitty Kingsbury. Clear lavender, medium height, late20c

### DEONIES

		hita shad	(Crousse, ed salmou; varieties	center	Dittsii.
--	--	-----------	--------------------------------------	--------	----------

Asa Gray (Crousse, 1886). Large pale lilac bloom, sprinkled with lilac dots. Free bloomer. Fragrant and fine variety...\$1.00

Duc de Wellington (Calot, 1859). Large sulphur-white bloom, fine habit, stamens strong. A good grower and very fragrant.

Edulis Superba (Lemon, 1824). Early, dark pink. Free bloomer .................................50c

Festiva Maxima (Miellez, 1851). Very large, free bloomer, pure white, with carmine touched center. Strong stems. Early..50c

Fulgida (Parmeutier, 1850). Bright magentared. Very free bloomer, semi-double. Fine for landscape effects. Rather late ......50c

Jeanne d'Arc (Calot, 1858). Blush-pink with silver and white, pure pink center petals, marked with carmine. Very fragrant; very free bloomer. Mid-season. A splendid sort. O hardy perennial is of more permanent value than the Peony. The first cost is the only cost, and they continue to increase in size and value for many years. The foliage is rich and of beautiful deep green color, which renders the plant very ornamental even when out of flower, and few other flowers are so well adapted for interior decoration and none make more massive color effect when planted in a border or in a bed on the lawn. Peonies range in color from cream and pure white through the various shades of pink and red to the deepest purple and maroon, in all possible combinations of tint and form.

They thrive best in a well drained, rich deep loan soil. Any good fertilizer if well incorporated with the soil will do, none is better than rotted cow manure placed below the roots so that the rootlets will not be affected until they have had a good start. Do not allow manure to come in contact with the roots. September is the best month to transplant Peonics, although they can be safely plauted later. The prices quoted are for good sized roots, which should bloom the following spring. For extra large clumps double these prices.

La Perle (Crousse, 1885). Soft flesh pink, with a satiny border. Perfectly formed flower, very dainty, beautiful and desirable. \$1.00

Livingston (Crousse, 1879). Very large and beautiful. Soft rose-pink; long, strong stems; late. One of the finest pinks. \$1.00

Marie Lemoine (Calot, 1869). Large, silverwhite, on strong stems of medium height.

Very late. A fine variety.......\$1.00

Marie Kelway (Kelway). Blush-pink; yellow petaloids; sweet scented. Very fine...75c

Marguerite Gerard (Cronsse, 1892). Pale hydrangea-pink with lighter center, flecked.
Center petals dotted with carmine. Strong grower, free bloomer; late. Extra fine
\$1.25

Mme. Bollet (Calot, 1867). Clear rose, with light reflects striped with carmine. Strong grower, free bloomer. Very late.....50c

Mme. Calot (Miellez, 1856). Blush white tinted with rose. Very large, free bloomer; one of the good sorts. Mid-season...75c

Mme. de Govin (Crousse, 1875). Large bloom. hydraugea-pink, fading to nearly white, with carmine. Free bloomer and a fine sort..75c

10 per cent discount on orders of \$10.00 or more made from this price list; 25 per cent on \$100.00 or over. Mme, de Verneville (Crousse, 1885). Large blooms of cream white, shading to blush in center, with a touch of carmine. Free bloomer. One of the grand sorts......50c

Officinalis Rubra, Plena. The old double red peony of our grandmother's garden....50c

Queen Victoria (Kelway, 1830). Syn. Whitleyi. Large, compact bloom, with broad onter petals; opens blush white, shading to pure white. Center petals marked red. Medium early; a fine cut flower sort....50c

Suily Proudhomme (Crousse, 1898). Hydrangea-pink fading to milk-white; very free bloomer; fragrant; fine for cut flowers.\$1.00

Victoria Tricolor. Outer petals deep pink, center shaded with yellow and flesh color; upright grower; free bloomer...........50c

Virgo Marie (Calot, 1859). Clear milkwhite; medium height; upright growth;

### Japanese Iris

THE Japanese Iris plants are of slender build, the foliage narrower than that of the Bearded, and of deeper green. The great flowers of strange and striking beauty are held erect upon slender very strong stems three feet and over in height. The flowers are sometimes self-colored, but more often have two shades combined, with a golden blotch. The single varieties have three large spreading petals, the double varieties six.

Culture—They will grow and thrive in any good mellow soil, well enriched, and well worked. They like plenty of moisture in summer, although it is not absolutely necessary, but water standing on them in winter will kill them. We recommend spring planting only for these Irises. If they must be planted in autumn, do it as early as possible, firm the ground-well, and cover with straw or litter.

Blue. Blue, white center stripe250
Gold Bound. Pure white, base of petals yellow.250
Orion. Reddish-pink, white center, white veins.250
Royal Purple. Purple and gold250
Topaz. White, splashed with light blue250
